

PRINCE GEORGE'S COUNTY
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #70-42 Building Date: 1918

Building Name: Kagle-McDonald House

Location: 6200 Princess Garden Parkway, Lanham, Maryland

Private/Residence/Occupied/Good/Inaccessible

Description

The Kagle-McDonald House is a four square house, two stories in height, of frame construction with a hipped roof. It is on a corner lot fronting on Princess Garden Parkway to the east. The main facade is three irregular bays, the second and third set close together. The second bay entrance is a door with an upper glass light and three lower panels. Windows are 6/1 with wide board surrounds, crown molded lintels and cement sills. The entrance is sheltered by a three bay entrance porch which wraps around and continues across the south facade. The porch roof rests on tapered wood columns. There are two heavy turned and chamfered newel posts at the bottom of the porch stair. The house is German sided rests on a high rock-faced cement block foundation. There is a hipped roof dormer with a double six-light window, sided with the asphalt shingle roof covering, centered at loft level on the north, east and south facades. House and dormers have boxed, crown molded cornices. The three bay west (rear) facade has a rear entrance shelter by a hipped two bay rear porch. There is an interior brick chimney on the west slope of the roof. The interior of the house has wide plain door and window surrounds. The open-run staircase has turned balusters and a paneled square newel post. The fireplace has a brick mantel with corbelling below the mantel shelf.

Significance

The Kagle-McDonald House was built ca. 1918 on a five acre lot in a newly platted subdivision called Princess Gardens. The subdivision was platted in 1903 by E. Baker Evans. Early residents of the subdivision, centered along Princess Garden Parkway, were railroad workers and tradesmen from the U.S. Navy Yard. Princess Garden residents had access to employment in Washington, D.C. via the trains which stopped at nearby Lanham Station. John C. Kagle, an engineer with the Pennsylvania railroad, purchased the five acre lot in 1916. The Kagles owned the property through 1960. The Kagle house is significant as one of the earlier houses in this suburban subdivision. The Kagle family were well-known residents of the small community. The house is architecturally significant for its four-square design.

Acreage: 17.135 square feet

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Kagle-McDonald House is a four square house, two stories in height, of frame construction with a hipped roof. It is located on a corner lot and fronts on Princess Garden Parkway, to its east.

The east (main) facade is three irregular bays, the second and third bays set close together at the north end of the facade. The second bay entrance is through a door with an upper glass light and three lower panels. Windows on the facade are 6/1 double-hung-sash with wide board surrounds, crown molded lintels and cement sills. The louvered shutters are screwed into place and immobile.

The entrance is sheltered by a three bay entrance porch which wraps around and continues for three bays across the south facade. The porch roof has a plain frieze and rests on tapered wood columns. The balustrade around the porch continues down the five-step porch stairway. There are two heavy turned and chamfered newel posts at the bottom of the stair.

The house is sided with German siding and has corner boards. It rests on a high rock-faced cement block foundation. The roof is covered with asphalt shingle. There is a hipped roof dormer with a double six-light window, sided with the asphalt shingle roof covering, centered at loft level on the north, east and south facades. House and dormers have boxed, crown molded cornices.

The three bay south facade has a central entrance sheltered by three bays of the ell shaped entrance porch. The porch rests on cement block piers infilled with a wooden lattice.

The three bay north facade is irregularly fenestrated, with a central entrance that leads to the cellar. A window above the entrance, situated between first and second levels, lights the interior stairwell.

The three bay west (rear) facade has a rear entrance north of the facade centerline. A hipped two bay rear porch shelters the entrance. The north bay of the porch has been enclosed. There is an interior brick chimney on the west slope of the roof.

The interior of the Kagle house has wide plain door and window surrounds. The open-run staircase has turned balusters and a paneled square newel post. The fireplace has a brick mantel with corbelling below the mantel shelf.

Mature cedar and hardwood trees follow the lot line in a rectangular pattern. A frame gable roof garage with a lean-to addition is located west of the house.

Prepare both a summary paragraph of significance and a general statement of history and support.

The Kagle-McDonald House was built ca. 1918 on a five acre lot in a newly platted subdivision called Princess Gardens. The subdivision was platted in 1903 by the property owner, E. Baker Evans.¹ Evans, listed as a farmer in the 1910 United States Census² had offices on Pennsylvania Avenue in the District of Columbia³ and sold lots in the subdivision during the first decade of the twentieth century. Early residents of the subdivision, which was centered along Princess Garden Parkway, were primarily railroad workers and tradesmen from the nearby U.S. Navy Yard.⁴ The Princess Garden residents had access to employment in Washington, D.C. via the trains which stopped at nearby Lanham Station.

John C. Kagle, an engineer with the Pennsylvania railroad, purchased the five acre lot in 1916.⁵ The house was built soon after that date. The Kagles owned the property through 1960, and subdivided three acres of it for home construction.⁶

The Kagle house is significant as one of the earlier houses in this early suburban subdivision. The Kagle family were well-known residents of the small community. The house is architecturally significant for its four-square design, combining features of the nineteenth century Victorian and twentieth century bungalow styles.
